SUPER SCREEN

The Newest Technology In Enclosure Screen

ASK YOUR CONTRACTOR FOR SUPER SCREEN ®

Here's why.

The Newest Technology Available Today

Super Screen is the newest technology available in protection for pool, patio or porch outdoor casual living. Super Screen is the perfect choice for the homeowner who demands the very best in family enjoyment and safety outdoors while providing a high-quality, long-lasting home improvement investment.

Low Maintenance:

Super Screen creates an outdoor fabric enclosure that is superior to that of today's fiberglass screen fabrics. **This new technology is setting a new durability standard for outdoor screen** - - for increased strength, stability against deterioration from exposure to the sun, and tear resistance. Combined with a previously unavailable **Ten-Year Limited Warranty**, you have an investment that will last and last - with fewer repairs, less maintenance and big savings in potential replacement costs.

Long Lasting Screen:

Until now, screen fabrics for outdoor enclosures have been limited in strength and durability, needing replacement in only a few years due to puncture, tearing or breakdown from exposure to the sun. The fiberglass screen material available today can become hard and brittle within 3 to 4 years, to the point it can be easily damaged by pets, flying objects (like a golf ball) or children at play. Within 6 to 7 years, with deterioration, a strong gust of wind can tear fiberglass screen to shreds.

Extrusion Coated Super Screen Outlasts Fiberglass:

It provides the homeowner many years of worry-free durability and protection, by incorporating superior tear resistance and tensile strength. Super Screens advanced polymer formula defies deterioration. In a simulated seven-year weathering test, Super Screen lost only 1% of its original strength. In fact, it remained 3 times stronger than new fiberglass screen.

Ten (10) Year Limited Warranty:

Super Screen last a minimum of seven years longer than the leading fiberglass screen. Super Screen screening fabric exceeds the requirements of Section 553.73 of the Florida Building Code. Super Screen is the new generation of outdoor screen is guaranteed to last.

The Newest Technology Available Today

Super Screen is the newest technology available in protection for pool, patio or porch outdoor casual living. Super Screen is the perfect choice for the homeowner who demands the very best in family enjoyment and safety outdoors while providing a high-quality, long-lasting home improvement investment.

Low Maintenance:

Super Screen creates an outdoor fabric enclosure that is superior to that of today's fiberglass screen fabrics. **This new technology is setting a new durability standard for outdoor screen** - - for increased strength, stability against deterioration from exposure to the sun, and tear resistance. Combined with a previously unavailable **Ten-Year Limited Warranty**, you have an investment that will last and last - with fewer repairs, less maintenance and big savings in potential replacement costs.

Long Lasting Screen:

Until now, screen fabrics for outdoor enclosures have been limited in strength and durability, needing replacement in only a few years due to puncture, tearing or breakdown from exposure to the sun. The fiberglass screen material available today can become hard and brittle within 3 to 4 years, to the point it can be easily damaged by pets, flying objects (like a golf ball) or children at play. Within 6 to 7 years, with deterioration, a strong gust of wind can tear fiberglass screen to shreds.

Extrusion Coated Super Screen Outlasts Fiberglass:

It provides the homeowner many years of worry-free durability and protection, by incorporating superior tear resistance and tensile strength. Super Screens advanced polymer formula defies deterioration. In a simulated seven-year weathering test, Super Screen lost only 1% of its original strength. In fact, it remained 3 times stronger than new fiberglass screen.

Ten (10) Year Limited Warranty:

Super Screen last a minimum of seven years longer than the leading fiberglass screen. Super Screen screening fabric exceeds the requirements of Section 553.73 of the Florida Building Code. Super Screen is the new generation of outdoor screen is guaranteed to last.

Durability:

This new fabric provides more than just a “good enough” screen. It provides insect and pest protection, privacy, safety, and debris control. Super Screen offers the homeowner extended durability and protection by incorporating superior tear resistance and tensile strength. It gives the homeowner a quality investment and trouble-free enjoyment, with lasting aesthetic appeal and low maintenance. Before Super Screen, outdoor screen products only gave customers choices between beneficial characteristics or features. There were no other choices – no protection against punctures, tears or frequent deterioration. Super Screen offers them all - so the most important, benefits of screen protection don't have to be eliminated.

Mildew Resistant:

Super Screen fabric includes a biocide compound that resists mildew growth, yielding longer lasting beauty from the fabric.

Low Maintenance:

Super Screen creates an outdoor fabric enclosure that is superior to that of today's fiberglass screen fabrics. This new technology is setting a new durability standard for outdoor screening for increased strength, stability against deterioration from exposure to the sun, and tear resistance. Combined with a previously unavailable Ten-Year Limited Warranty, you have an investment that will last and last - with fewer repairs, less maintenance and big savings in potential replacement costs.

Compare Cost:

Over the life of the fabric, with an unmatched warranty, Super Screen will prove to be a smart, worry free investment. Super Screen has a life expectancy of more than 10 years and is backed by a 10-year limited warranty. The average lifespan of fiberglass fabric is approximately 6 years, and is backed by only a 1-3 year warranty.

Tear and Puncture Resistant:

A combination of superior strength and weight create unmatched durability in Super Screen. At 6.5 oz. per sq. yd., Super Screen is **18% heavier than competitor offerings**. Unlike fabric made of dip-coated fiberglass, Super Screen fabric utilizes an extrusion-coated polyester core yarn, which results in **superior tear and tensile strength that is 300% stronger than competitive offerings*** and extended life of the product. These features translate into a fabric highly resistant to punctures and tears, caused by falling debris and pet or pest damage, * Strengths are industry-established measures for the amount of force required to tear both damaged and undamaged textile products. The polymer and polyester properties of Super Screen defy deterioration. In a simulated seven-year weathering test, Super Screen lost only 1% of its original strength. It remained 3 times stronger than fiberglass screen.

Stability from UV Damage:

The UV tolerant properties of Super Screen reveal themselves in the form of unsurpassed color retention, longevity, and filtering characteristics. With Super Screen, extended exposure to the sun will not result in the bleaching, flaking, and fading, like other screens. Fiberglass screen tends to get brittle with age and sun exposure, while Super Screen is virtually unaffected – which means it will look newer longer and save on maintenance.

Available Widths:

Super Screen mesh is available in 17/14, 17/17 and 20/20 in Black, White and various colors depending on the quantity of rolls ordered. It can be supplied in roll widths ranging from 24” wide – 120” wide.
